

FlexPay™ 2D Barcode Imager

Customers are loyal to businesses that provide great service, seamless transactions, and valuable rewards. The FlexPay™ 2D Barcode Imager can help maximize the reach of your customer loyalty program by integrating it with your fuel dispensers.

Allow your customers to successfully scan reward cards, coupons, and loyalty codes on their mobile devices through area imaging technology.

The FlexPay 2D Barcode Scanner can read a wide variety of common 1D and 2D barcode formats including:

1D Barcodes	2D Barcodes
UPC Codes	Quick Response (QR)
EAN Codes	Aztec
Code 39	PDF 417
Code 128	Data Matrix

With omnidirectional scanning, the FlexPay 2D Barcode Imager can easily read barcodes from every angle and orientation, making it consumer-friendly and cost effective. It also integrates into the FlexPay IV CRIND as a part of your EMV CRIND upgrades.

With continued broad adoption of mobile applications, the FlexPay 2D Barcode Imager provides the flexibility to grow with your business.
